

Proudly presents our eco-friendly

# Travel Series

- An average Singaporean uses **13 plastic bags** a day
- Between **500 billion and 1 trillion** plastics bags are being used each year worldwide
- And about 100,00 sea turtles and other marine animals die every year because they either mistake the bags for food or get strangled in these “plastic soups”
- It takes up to **1000** years for plastic to decompose and in most instances they can’t be fully decomposed
- It is predicted that **by 2050**, plastic in the oceans will outweigh fishes

**LET'S DO OUR PART & HELP REPLACE DISPOSABLES WITH REUSABLES**

Many manufacturers are now coming up with reusable alternatives to plastics, which come in many forms;

- Plant-based materials
- Foldable Cotton
- Silicone
- Paper

All of these products can be classified under the Lexngo ethos of

# Think Reusable • Less Disposable

However, all of these reusable materials available at present have one problem...  
**They are usually not resealable and leakproof**

These inconveniences prevent people from using eco-friendly products

**To resolve this issue, Lexngo came up with our Silicone Reusable Fly Bags and Silicone Collapsible Travel Bottle. They are environmentally friendly, convenient and can be resealed for maximum security.**

**Whilst helping to reduce the amount of plastic waste that pollutes our planet.**

# Buy Better • Buy Less

# Why is Silicone?

## Its non-toxic and reusable

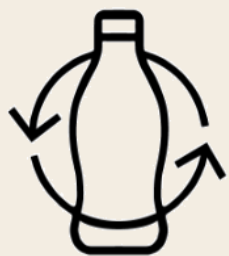

Our products are mainly made of silicone, whose main ingredient is silica, a natural element on earth which consists of sand and quartz. Silicone is made up from Silicon (Si), the same element glass is made of **Silicone is completely different from petroleum based plastics.**

Silicone is non-toxic, odorless, heat and cold resistant. It does not release toxic substances at high heat and is reusable. It is more durable and safer compared to conventional rubber and plastic.

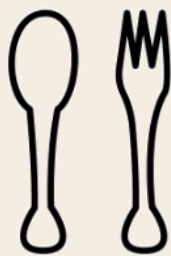

Utilizing the distinct properties of silicone, we incorporated product designs into daily lifestyle products to encourage lower consumption of one-off disposable items.

## Production & Quality Control

- We have our own factories and deploy a one-stop production process from design, development through to and including production
- During our production process, we use quality materials with certification. Together with the rigorous process of post curing, we not only guarantee our products' safety but also maintain high quality
- Our strict quality control and production procedures ensure product quality and safety

# Silicone e-Zip Bags

- Environmentally friendly, made from 100% food grade silicone
- Suitable for travelling; perfect for holding liquids, aerosols gels and travel accessories neatly and organized
- Smart e-Zip design helps to close the bag tightly
- Before and after use, clean with light soapy water and dry thoroughly

Product video

# Silicone Collapsible Travel Bottle

At full extension, it holds 3 ounces of liquid (shower gel/lotion for air travel, etc). Content easily comes out when the bottle is squeezed. After using, simply collapse it in half for space saving.

- Collapses for space saving storage.
- Perfect for storing shower gel, lotion, etc.
- Not easy to break, suitable for travel
- Suitable for dishwashers
- FDA food grade

## Product and product packaging

**Silicone Reusable Fly Bag  
(For Travelling)**  
Capacity: 1.4 L

**Silicone Collapsible Travel Bottle**  
Capacity: 89 ml
